****** AVON PARK LOCALS. **

Dr Gullett of Zolfo, made the Park a short visit on Monday.

O. P. Wernicke made a business trip to Wauchula Saturday accompanied by

We understand that several people whose names have not been given us yet are coming with the Butlers about

Mrs. Frank L. Smith and her little girl who have been visiting Mrs. Burleigh for a few weeks past, returned to Tampa on Saturday with health considerably improved.

Mrs. Doolittle and her infant child came back from Wauchula last week. The babe appears to be a little better since the doctor's treatment began.

W. R. Doolittle is giving his house s coat of paint, and will give it one or two more coats in the winter. Geo. F. Smith is helping on the job.

Mr. T. D. Walden of Highlands, N C., arrived here for the winter on Sept. 22nd, and is occupying his cosy cottage on Lake Tulane. He had a hard time with the hay fever at Highlands and came here for relief and cure.

"The proper study of mankind is man." your neighbor, for instance; and for a "working hypothesis" always assume the worst you can imagine; thus you will grow more and more of thieves from a distance sneak in and like the model you have set up in the studio of your imagination.

a full-blood Jersey cow, registered. ficient to do it, or else repeal all the She has a young calf, and is said to be game laws and give all an equal chance a splendid milker. She is probably the to kill and destroy to the full satisfacmost valuable cow ever owned in Avon

B. F. West has recently fixed up the fence on the street sides of his corner lot of 20x100 feet at the southwest corner of block 46, section 22, which is owned by Dr. McCartney with the ex-

ception of this little corner. Mr. Geo. F. Kellogg has just been improving the appearance of his property by fixing up his fences, cleaning the sidewalks and a broad strip along his side of the streets that bound fully one-third more floor space in his his home lot of three acres on the

north, west and south. Tuesday Rev. S. J. Townsend, Mrs. Townsend, Miss Grace Townsend, Mrs. Isabella Bennett, Miss Edith Bennett Clarence Bennett and little Miss Fannie Bennett started for Winter Haven by overland route. They go to attend a Christian Endeavor convention there. We have received the October number of "Word and Works Magazine." the first number of the new series enlarged and greatly improved, and combining the Irl R. Hicks almanac. This new combination will give the magazine a great uplift in its circulation. Word and Works Publishing Co., St. Louis, Mo.

The camping party that started for the lakes last week found the outlet of Lake Letta such a deep stream that they could not ford it, and so they turned back and camped at the Buck place till the next day, and returned home, claiming that they had a good

S. J. Brown has a letter from Dr. Muir, written from his home in Hallock, Minn., to which he had just returned from his Pacific coast trip. His wife remained behind in Portland for a little longer visit. The doctor did not really say he would come to Avon Park the coming season, but what he did say seemed to warrant a rather strange inference that he might be expected here. He stated very clearly neither himself or his wife liked California, and they visited the principal places in the State, north and south, but much preferred Florida.

Miss Edith Bennett and her brother Clarence will go from Winter Haven to Winter Park to enter the school there. They may not be here again until the end of the school year. We are glad they have this opportunity and hope they will make the best possible use of it. The children came here as little ones eleven or twelve years ago and have grown up here, and for five years their mother has stood at the head of the family. John, the eldest, has proved a plodding, faithful boy and has now entered his 21st year. The entire family enjoy the well-deserved respect of all their neighbors, and we all feel an interest in their well-being.

A story and-a-half cottage in Avon Park in good condition, 5 rooms with furniture. The house is well painted, attractive in appearance, situated within less than 5 minutes walk of either stores and postoffice. The lot is 100x 100 feet, pleasantly located. Price \$400, cash. Title perfect. Inquire of W. R. DOOLITTLE, Avon Park, Florida. AVON PARK.

It seems to be true, upon what apto go alone. He thinks that this gang of law-breakers comes from a distance, probably from beyond Peace river, and some of them quite likely from Hillsborough county.

So it seems that while the people who live in the vicinity of the game keep a watch upon each other, a gang scoop the whole business. The law should be impartially enforced and Mr. O. P. Wernicke has just bought there should be an available force suftion of their murderous instincts.

Improvements That Show There is Some thing Doing at Avon Park:

J. C. Burleigh has had plenty of building work going on for several weeks past, keeping several men busy esides himself, and it will last a good many days yet. The work on his store and dwelling involves several alterations and improvements in the old part, as well as much new building, and when all is completed he will have This added room has been store. needed for a good while to provide for the orderly arrangement of the different lines of goods kept in stock.

Back of the store, fronting on the side street-Waycross-is the entrance hall to that part of the building constituting the dwelling. From the hall, doors open into the dining room on the east, the kitchen on the north, the main store on the west, and also on the west into the hall from which the stairs go up to a light and pleasant sitting room on the second floor, and five large, light, airy bed rooms on that

floor. The kitchen and dining room are flanked by spacious porches which pears to be reliable circumstantial furnish a great deal of convenient and

AN INDIAN'S CUNNING

THE BLACKFEETS' STORY OF THE

Daring Strategy by Which This Fleetest of All Steeds Was Secured For His Own Tribe by the Smartest Thief Among the Crows.

All Indians who use horses are very and of horse racing and not only race helr own horses against one another, at they race their own against those of other tribes and used to do this even in the wild era of the buffalo and of constant warfare. Even at that time two grand buffalo hunts of each year and after the hunting was over pitted the fastest horses of the various bands one against the other. At one time not so very long ago the Blackfeet had the very fastest horse that any one knew of, the fastest horse of which any one could tell or which any one had seen. He was a source of wealth to the tribe for Indians are very fond of betting, and this animal always won every thing that was bet against him. You can imagine how proud the Blackfeet were of this creature. You can also magine how envious were the Stoneys, the Crows, the Sioux, the Creeks and the other Indians of the plains.

Stealing is considered fair between tribes, and if it can be successfully done those savage people think it very honorable, even glorious. The Black feet, therefore, kept the wonderful race horse in a tent at night. They did any dish. An eminent physiologist in not dare leave him out with their other horses. They bought a string of bells at the Hudson Bay company's nearest fort, put the bells around the horse's neck, tied him to a tepee pole inside a big tepee and set four men to sleep in the tent with him. This was the rule every night, and on no night did the men forget to close the door of the tepee and "cinch" it tight with thongs of buckskin. Whoever could steal that big white beauty of a horse had to be a very clever thief, they thought; but, in truth, they never dreamed that he could be stolen.

The smartest thief among the Crow Indians told his chief and the head men that he was going to try to get that horse away from the Blackfeet. One evening he crawled through the grass to the tall bluff along the Bow river (north of our Idaho, I think, was the locality), where the Blackfeet had their camp. He saw the noble horse led into a certain tent, and he saw the four watchers go in and close the door. Night fell, and he crept down the slanting bluff into the camp. The only thing he had to fear was the barking of some dog. If a dog saw or heard im and barked, that would set all the 7ther dogs barking, and he would be sbliged to run for his life. Stealthily, s only an Indian can move on his softy moccasined feet, this arch thief of the thieving Crow Nation crept into the Blackfeet camp. He had to step over several sleeping dogs, and he did not awaken one. He came to the tent of the white horse. He looked it all over. He went to another tepee and took a travols from its side and carried it and set it up against the horse's tent.

A travols is the wheel-less wagon the Indians use in the summer. It is made of two long poles with the upper ends near together; the lower ends spread apart and drag upon the ground. You see by this description that if a travols is stood on end it can be made to serve as a sort of ladder. Thus the arch thief of the Crows used the one he put up against the horse tent. On it he climb ed to the top of the tepee, and from there he got a view of the interior looking down between the tent poles that form the sides of the chimney hole. He saw the horse dimly, and even more dimly he saw the four men beside the horse, all asleep. He climb-ed upon the tent poles; he polsed his body very nicely in the chimney open-

ing; he dropped fairly and squarely upon the white horse's back. The instant he felt himself on the ek of the beast his knife, v Moulding. in his hand, swept through the cord that tethered the horse. His heels shot in against the horse's sides, the bells TAMPA, FLOR rang out sharp and clear, and the horse snorted with surprise. But the pressure of the thief's heels urged the animal forward, and as he took one ster the man reached out and slit a straight up and down through the fastened door, which was only buckskin. The four Indians leaped to their feet, but the horse and his captor were now out in the open ground and like the wind shot away from the camp. The watchers ran and yelled, the dogs barked, the whole tribe rushed out of the tents, and every man sprang to horse. But what was the use? There was no horse that could catch the animai, and so they all turned sadly home again after a mad ride of a mile or two. The thief rode in triumph home to the tents of the Crows, and from that day his tribe owned the great white horse, and his fame and their riches increased.—From Julian Ralph's "Stories Told by Indians" in St. Nicho-

A PLEA FOR GOOD PIE

IT IS A WHOLESOME FOOD IF IT IS PROPERLY MADE.

The Crust Should Be of Water-like Thinness and Crisp and Flaky. Five Rules to Be Observed In the Making of a Perfect Pie.

Although food theorists and food cranks have varying opinions as to the wholesomeness of certain foods, they one and all agree in denouncing ple. It is the one dish most ardently condemned, and yet the one dish most universally liked-at least by Amer-Still, notwithstanding the bad reputation ple enjoys, it is a whole-some dish if properly made.

In making it the average housewife rolls out a heavy, sodden crust, and then spreads it in a thick layer over the bottom and sides of a pie plate. She forgets to rub this crust with the white of egg and immediately puts in the filling of custard, fruit or mince meat, whose juices will later soak into the crust, making it still more sodden. She then covers the pie, perhaps, with another layer of this thick pastry and puts it in an oven that is not hot enough. The oven should be so hot that the pastry will brown before the butter in it has barely a chance to melt. The crust will then be crisp,

Another reason why ples are so universally disapproved is that they are nearly always made with lard, or half lard and half butter. Lard should never be used in a pie or, in fact, in a leading university says that "lard is the bane of American cookery and is fit for no stomach except a pig's." A tiny bit of lard in a batch of bread may be excusable, but even then butter is bet-

All ple crust, of course, should be of wafer-like thinness. Not only are properly made crusts harmless, but some popular fillings are exceedingly whole-What, for instance, could be better than a custard or a pumpkin filling? The latter is, as a rule, only a custard rich in eggs, with an addi-tion of pumpkin and a few spices, which are alds to digestion.

Without doubt all ples should be eaten in moderate portions, especially by delicate persons, but this rule applies to any dish. Even cream is not good for persons under certain conditions, yet no one but a crank would deny it to a person in good health. Many food faddists expect healthy people to live daily on an invalid's diet.

There are five rules to observe in the making of a perfect ple. the undercrust with the white of an egg before putting in the filling to prevent it from soaking into the pastry; second, bake it in the hottest of ovens; third, place it in the lower half of the oven at first against the bottom, later removing it to the upper shelf; fourth, always place crust in the refrigerator to become thoroughly chilled and hard before filling and baking it; fifth, pound the pastry well until it is filled with air spaces.

Volumes could be written on the cor-

rect treatment of pastry. Any of the recipes in standard cookbooks will do, however, if a few details are carried

A marble board is an ideal arrangement for rolling pastry. A current household magazine suggests that the hideous marble tops of old fashioned tables might be fitted up for this pur-

Smooth, even pie crust is an abomina tion, and yet many housekeepers think that is the proper way to have it, and sometimes they will even be heard to complain when by accident their ple crust is rough and almost breaking into wafer-like flakes. This flakiness is, however, the proper condition of pastry.

Pies as a rule are better adapted to winter than a summer diet, because of the butter, which makes them too rich fer warm weather fare. Fruit ples, however, are good at all seasons, and there are few things more attracthan huckleberry and other fruit pies even in the hottest dog days. There are also many good celd meat pies which ere welcome at picnics. preparing a chicken or meat ple it is always better to add a little baking powder to the regular rule for ordinary

ple crust. Add one cup of butter to every two cups of flour (pastry flour). Then chop together in a wooden bowl, with an erdinary old fashiened chopping knife, until the mixture is broken into small bits the size of peas. Add half a cup of ice water. Mix with a knife, then beat and turn and beat and turn until the whole is smooth, but full of lightness. This pounding and turning is better if done upon a marble board in a cool storeroom or cellar. Never touch the pastry with a spoon or the hand. but with a knife; then put it where it will become ice cold and hard before rolling it out.

There are several variations to this rule which can do no harm. If baking powder is wanted, add a teaspoonful to this amount of flour and butter .-New York Tribune.

Not so Attentive Now.
"Is Tim Slimmers still paying attention to Mandy Tompkins?" asked the man who had been away from home for some time.

"No," answered Farmer Corntossel.
